

Awarded by

Application:-

Tech. Data :-

- Material composition: zinc plating.
- Material, corrosion: S S.

Features:-

- Roughness working principle; installation by controlled torque.
- Use for high loads.
- Assessed for two installation depths.
- Easy installation.
- Use in non-cracked concrete.
- Previous installation, or through the fixture.
- Use for static or quasi-static loads.

Suitable for :-

- Structural applications in non cracked concrete.
- Safety barriers.
- Billboards, machinery, boilers, signals, steel beams. Fixing wood structure in concrete
